

# ADEPT Hospital Solution Named as Innovation Winner

*Applied Science, Inc. automated patient data entry and monitoring solution leads to improved patient-focused care*

**SACRAMENTO, Calif – November 9, 2017** – Medical solutions provider Applied Science, Inc. (ASI), digital product development services leader GlobalLogic, and Dignity Health, one of the nation’s largest healthcare systems, announced that [Automated Data Entry Process Technology \(ADEPT\)](#) was the winner in the 2017 [Sacramento Region Innovation Awards](#) in the Medical and Health Technologies & Services category.

The Sacramento Region Innovation Awards recognize the area’s vibrant innovation community. ADEPT, in the medical category, reduces the complexity of interacting with electronic medical records (EMR), enables the timely entry of patient point of care information, and gives nursing clinicians more time to take care of patients.

The ADEPT software platform automates the patient point of care processes, including those that require interaction with medical devices, ensuring that every patient record is accurate, complete, consistent, and compliant. It provides real-time access to actionable data, enhances the healthcare provider’s existing EMR investment, and optimizes workflow. ADEPT is the brainchild of ASI, who partnered with GlobalLogic for product development and software engineering, and Dignity Health, for clinical input, to meet the real-world needs of nursing clinicians. This innovative software platform enables healthcare organizations to benefit from increases in staff efficiency, improved patient data records, and greater operational visibility.

“Since implementing ADEPT at Dignity Healthy Mercy San Juan Medical Center in Carmichael in early December 2016, the platform has processed in excess of 21,000 patient records without one call to our IT organization for support. The setup was straight-forward and the system cut in half the time it took our staff to complete vitals rounds,” stated Chris Wood, vice president, neuroscience and orthopedics at Dignity Health.

“Applied Science is honored to have the ADEPT solution recognized as the medical technology and services winner in this year’s Sacramento Region Innovation Awards. The partnership of ASI, GlobalLogic and Dignity Health is excited by this recognition and passionate about the positive impact we believe the ADEPT point of care solution will have on the delivery of healthcare,” said Jonathan Morgan, chief executive officer for ASI.

Arya Barirani, chief marketing officer for GlogalLogic, added “Our experienced software engineers and project managers worked closely with ASI and their customer Dignity Health to

develop a reliable, high-performance, intuitive user experience. It is gratifying to our teams to help bring impactful, innovative solutions such as ADEPT to life for our customers.”
